## NECKBAND HEADSET

### Product description

The original Siberia Full-size Headset was released in late 2004 and instantly became a smash-hit among leading professional gamers. The product was the first professional gaming headset to fully cover the users' ears, adding new levels of comfort to audio products for gamers.

The new SteelSeries Siberia Neckband Headset features a similar eye-catching visual design. The comfort and soundscape in the SteelSeries Siberia Neckband Headset was fine-tuned with the help of professional gamers, electronic DJ's and rock musicians. The combined input and feedback from this broad range of picky audiophiles helped create a soundscape optimized for a multitude of uses. Final sound optimizations for gaming were done with the help of Abdisamad 'SpawN' Mohamed, one of the world's most accomplished Counter-Strike players with 12 major international grand-slam championship titles and "Best of Class" awards by leading eSport sites in 2004, 2005 and 2006. The SteelSeries Siberia Neckband Headset also includes a specially designed converter that enables users to fully enjoy stereo audio in a headset, and still be able to use Xbox Live voice at the same time.

### Special features

- \* Developed for gaming and music
- \* Retractable microphone
- \* Full-size neckband design
- \* Xbox compatible

### Availability date

November 2007

### Part number

51006

### Package contents

Headset, extension cord with volume regulator, Xbox 360 converter

### Technical specifications

<b>Headphones</b>	<b>Microphone</b>
Freq. response: 18 - 28.000 Hz	Freq. response: 80 - 15.000 Hz
